

custom console solutions

Mauell delivers state-of-the-art command console solutions designed for use in a 24/7/365 environment by combining the highest grade materials with **proven ergonomics**.

Mauell consoles provide design flexibility, adaptable work spaces, and a number of innovative options and features. Mauell console solutions focus on maximizing user workspace, **seamless integration of technology**, and maximizing operator wellness and productivity.

Mauell has been engineering command consoles in the U.S since 1996 and is in control rooms all across the nation.

At the heart of your operation is your command console...

Sit/Stand
Adjustable Work Surface

During mission critical situations, your control room is **the heart of vital operations** and the cockpit for decision making. Mauell console solutions are engineered with a complete understanding of control room operations equipping your control room to handle the routine and the unexpected.

Engineered to last, Mauell consoles feature solid surface edging, durable steel framing, and multiple lift columns. Customization is key with an array of material, storage, and lighting options specific to your control room needs.

Mauell takes a fresh look at every console we design. We investigate your control room needs in order to create **the perfect solution**. Here are some of the design features and options that are commonly found in Mauell-built consoles:
